

SECTION 411.120 NOTICE AND REPORTING REQUIREMENTS

B57002 - Court- 2005 WPC

This circuit was a worst performer from SAIFI and CAIFI perspectives. It serves 1199 customers at 13.2 kV and is considered urban. Figure 1 shows the percentage of CI and CMI by cause code for 2005.

Figure 1 - 2005 WPC - B57002 Court by Cause

This circuit had experienced a number of underground-related outages over the past couple of years. A project to replace 750 ft. of cable was completed in August 2005 at an approximate cost of \$30,000. Remaining work to be completed in 2006 includes many animal guards. This work is expected to be completed at a cost of \$4,138.

This circuit was last trimmed in 2002. It is scheduled for the next circuit wide trim in the fourth quarter 2006.

SECTION 411.120 NOTICE AND REPORTING REQUIREMENTS

B82002 - Stark- 2005 WPC

This circuit was a worst performer from a CAIDI perspective. It serves 170 customers at 12.5 kV and is considered rural. Figure 2 shows the percentage of CI and CMI by cause code for 2005.

Figure 2 - 2005 WPC – B82002 Stark by Cause

Two outages were the biggest contributors to the customer minutes of interruption. Both outages occurred during severe weather on June 4, 2005. A thirteen-hour outage affecting 35 customers was caused when primary broke during the strong winds. An additional 24 customers were affected for seventeen hours when a downed tree was blown into the line. Nearly all other outages affected single customers for a variety of reasons. All corrections were made at the time of the outages.

This circuit was inspected August 8, 2003 and subsequent work plans included one pole for replacement and five crossarms that were loose or damaged. These corrections were completed by the end of August 2003 at an approximate cost of \$2,500. The circuit will be patrolled again in 2006 and appropriate work plans will be developed at that time.

This circuit was last trimmed in November 2003 and is scheduled for a circuit-wide trim in the fourth quarter 2007.
